

# Built-in energy savings

## Safe and sound: high quality of the produce

The sales-boosting effect of Carrier multidecks has an impact from day one: The insulated glass doors afford the produce reliable protection from ambient conditions; for customers, the quality and freshness of the merchandise remain clearly visible. What is more, because there is no cold air spillage from the multideck, the shopping area remains at a pleasant temperature.

## The one and only original: the Carrier solution

Carrier multidecks with insulated doors provide grocery stores with the benefits of sustainability, exceptional temperature stability and significant energy savings. The Carrier solution caters for all chilling and freezing requirements: Our range of refrigerated and freezer display cases are fully compatible, ensuring long-lasting optimal operation and significant reductions in energy consumption.

## A seamless fit: the retrofit-kit for glass doors

Carrier's Evolution5 series multidecks can be retrofitted with insulated glass doors – a perfect fit for the accustomed high quality.

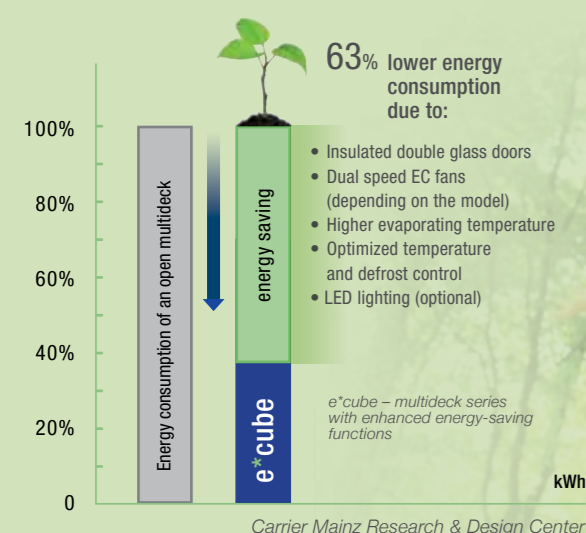

## Benefits at a glance

- Significant reduction in energy costs
- Reduced refrigeration load
- High level of planning certainty
- Fast return on investment
- Optimal temperature performance
- Prevention of cold air spillage increases customer comfort when shopping
- Fewer defrosting phases prolong the quality of the produce

## Benefits of the retrofit-kits

- Offer practically all the benefits of a brand new multideck with insulated glass doors
- Full range of Carrier services (advice, original parts supply, installation)
- Full warranty

## The complete Carrier package for energy savings of up to 63%!\*

\*Performance data in comparison with the standard version of Motaras and Motaras GD e\*cube multidecks; depending on features, ambient conditions and type.

# Multidecks with glazing

## Not just doors

Optimized energy-saving design

High temperature stability

Elegant glass fronts

Ref. No. ML-MS-691-GB-1213 | The manufacturer reserves the right to change the product specifications without notice.

# Set standards with standard doors

The transparency of the standard doors allows for a virtually unhindered view of the goods on display. The slender frames are inconspicuous and customers notice at once the ease with which the double insulated glass doors open and close.

LED lighting (optional), which has a low environmental impact, is housed in the mullions and provides a pleasant light.

Elegant, slender frames allow an unobstructed view

Ergonomic handles

Energy-saving LED lighting on request

Integrated door lock

## Benefits at a glance

- Double insulated glazing; inner face with low-E coating
- Inner and outer panes made of tempered glass
- Sturdy hinges with lock-in mechanism, 90° opening angle
- Lighting integrated in the mullions
- LED lighting on request

# Complete transparency: anti-reflective all-glass doors

## All-glass doors

These double insulated doors need no frames. Customers therefore have a clear view of what is important: the food itself. A display that caters entirely to the shopping behavior of today's customer.

## Anti-reflective (AR) all-glass doors

This special coating achieves excellent results in eliminating reflection from the glass surface – the visual effect is similar to that of an open multideck: The merchandise is displayed with virtually no sales barrier.

A transparent argument: comparison between all-glass and anti-reflective all-glass versions

Pleasant to touch, comfortable door handles

Perfectly designed down to the smallest detail

Resilient door hinges with an opening angle of 90° and automatic hold-open function

## Benefits at a glance

- Double insulated glazing with anti-reflective coating (AR version) or:
- Double insulated glazing; inner face with low-E coating
- Fitted throughout with tempered glass
- Soft-closing doors with hold-open function
- Lighting integrated in the mullions, LED lighting on request
- Easy to clean due to smooth design

# Simple solution – impressive impact: doors made of single-pane tempered glass

Practical handle-free grip openings ensure maximum transparency

Resilient metal door hinges with an opening angle of 90° and hold-open function

Carrier doors made of single-pane tempered glass also undergo stringent durability tests (over 150,000 open/close cycles), collision and transportation tests

Single-pane tempered glass doors are virtually invisible and ensure the customer maximum visibility of the merchandise when shopping. Besides significant savings in

energy, this cost-effective solution provides an attractive presentation of the products on display.

## Benefits at a glance

- Single-pane tempered glass doors – the energy-saving “24/7 solution”
- Low-E coating to reduce formation of condensation
- Soft-closing doors with hold-open function
- Crystal clear design, virtually invisible
