

Hera™

The beauty
of transparency

Excellent product visibility

Double curved, tilt bottom hinged glass

Attractive, modern design

Wide range of field applications

The Hera service counter combines style with modern presentation

The secret of timeless style is hidden in the details

Displaying the product

What does a consumer look for in a shop? The product. The refrigerating cabinet must enhance the fresh products and make them appealing to the consumer.

Transparency

Transparency improves trust. Transparency means using solutions and materials that fully display fresh products.

Visibility

The merchandise must be easily visible from every vantage point. This means reducing to a minimum all cabinet components that may conceal the fresh merchandise while increasing merchandise visibility to the maximum.

Eye-catching service counter for optimum presentation

Hera's wide range of options are a real benefit for customers

The Hera service counter offers excellent merchandise presentation with clear food visibility from up close and from a distance.

An attractive and diversified fresh food offering is crucial to awakening customers' senses. A wide range of food requires not only a broad range of technical solutions to be presented - but also a seamless appearance.

One model with hundreds of different solutions

Design & look

Good taste evolves. Carrier Commercial Refrigeration has interpreted this evolution through the design of new and simple lines that can easily be integrated into the architecture of modern shops.

Modularity

The Hera service counter offers hundreds of different solutions. That is because Carrier Commercial Refrigeration's customers always need to display

a wide variety of fresh products, in various stores and configurations. Sometimes large displays are required, in other cases, smaller cabinets are preferred. A modular design makes these solutions immediately available.

When smaller is better

Size 75 from the Hera display range offers small shops and large retailers solutions for efficiently managing display and retail space. This is interesting not only for small shops, but also for all those retailers who need to differentiate their solutions.

Self-service

The Hera self-service counter has all the flexibility you need to accommodate a wide-ranging selection of merchandise at any place in the store.

Product features

- Fan assisted air circulation.
- 4 display decks (750 mm, 850 mm, 900 mm, 950 mm)
- 2 base heights (600 mm and 540 mm)

Fitted with

- Evaporator R404A, protected by cataphoresis
- Energy saving fans
- Solar digital thermometer
- Air discharge
- Terminal block for electrical connections

Options

- Product dividers
- Pricing rail
- Cutting board, Knife sheath, Scale/slicer platform
- Cabinet with pedestals
- Electric defrost heater
- E-pack for other-make control

Optimum visibility for attractive merchandising

The Hera counter's flexible platform design provides a complete set of geometries to cover many applications.

Competitive features

The combination of ergonomics, quality and energy savings make Hera a unique solution to your requirements

Ergonomics

The less strain placed on the store's staff, the more attention they can devote to customers. The shop operator should be able to carry out operations in the most efficient way. Carrier has worked to simplify these operations. For example, in the soft tummy bumper profile, we have developed a multi-use channel for the electrical cable that supplies the scales. Trenchers, paper holders and other accessories are moveable and functional parts of the counter.

Quality

Stainless steel raw materials and elegant design are distinctive features of Carucco counters. Aesthetically pleasing design is inherently impressive but, at the same time, puts the product to the fore. The cabinet surfaces that require cleaning are easy to reach in order not only to guarantee hygiene, but also present a sanitary look.

Material selection also plays an important role. In continuous operation the individual components have to resist the severest strain, whilst meeting visual demands.

Energy savings

The motivation behind Carrier Commercial Refrigeration's new solutions is to significantly reduce energy consumption and maintain consistently high performance. The use of high-performance fans and fan speed control saves energy, reduces operating costs and respects the environment. Developments include a new control unit that drives the performance characteristics of the overall unit to ensure efficient operation.

Polyethylene cutting board

Paper tray

Knife holder

Hanging bar for bags

Scale / slicer platform

Standard or coloured front panels are available. Customised solution also available with additional bumper rail.

Product overview

* Plug in versions available with wheels for size 125, 188
 Plug in versions available with standard base (w/o wheels) for size 125, 156, 188, 250, 312, 375
